

Colombia AVOCADOS FRESH TO THE MARKET

Discover the great taste and rich culinary heritage of Colombian avocados. Given its climate, various altitudinal layers, and nutrient-rich lands, Colombia offers avocados throughout the year, a quality that is an added value and attractive for retailers.

A unique combination of fertile land and warm climate is responsible for the delicious flavor. Thanks to the consistently sunny location, Colombia's avocados are available fall year round and are ideal for savoring throughout the summer. Colombian avocados are perfect for seasonal dishes, to top a favorite meal, or to enjoy à la carte.

Colombian Hass Avocado Characteristics

Colombian Hass Avocados offer a bolder, creamier taste compared to the usual Mexican Hass Avocados that we are used to eating in North America. Colombian avocados are also great for cooking because of their high fat content (good fats only, don't worry). This is a very exciting time for avocado lovers to try out a new kind of variety!
